Greetings Minh Vuong

I am an attorney representing Dr. Judy Wood who has lodged certain legal challenges to the official explanation of what caused the destruction of the World Trade Center complex on 11 September 2001. Essentially, Dr. Wood asserts the existence of an abundance of evidence that the degree of complete destruction exemplified in Photo 1, below, can only have been caused by high energy weapons that had the capacity to bring about molecular dissociation, resulting in the complete annihilation of the WTC:

Photo 1

In addition to the obvious fact that a kerosene-based fire would not cause what is seen above, it has been

demonstrated that cleanup techniques used when directed energy weapons have been applied are evidenced at ground zero.

Chief among the evidence consistent with cleanup after use of directed energy weaponry is the use of dirt to halt to dissociation process, as seen here:

Photo 2

and here:

Photo 3

and the trucking in of large quantities of dirt for cleanup purposes as seen here:

Photo 4

and here:

Photo 5

It is known that ARA and SAIC both served as contractors to NIST in the preparation of that agency's official report on what caused the destruction of the WTC. And, it is also known that both ARA and SAIC are involved in the development of directed energy weapons and in the testing and evaluation of the lethality effects associated with such weapons, including, it is thought, cleanup procedures.

It is requested that you reply to this email or forward it to someone who can reply concerning the following queries:

1--Are the visual effects shown in Photo 1, above, consistent with the use of directed energy weapons?

2--Are the other 4 photos (Photos 2 - 5) shown above consistent with the cleanup procedures that would be used if directed energy weapons had been suspected?

Thank you in advance for your consideration of and cooperation in replying to the queries set forth above. Please feel free to telephone the office number set forth below if there are any questions concerning the queries posed herein.

Thank you,

Jerry Leaphart
